Shadownes are armed with a Valsar cannon, a huge laser powered by large capacitors which draw power directly from the tank's engine. The Shadowwreave was developed by a Titan-Kill and war machine factory. Its Shadow-Killer also gives it great stand off the power against regular anti-tank vehicles. All the Shadowwreave, battery and fuel for using the Shadowwreave in games of Warhammer 40,000 can be found in Imperial Armoury.
